Topic: Link List Approach For Lean Development

—Costs of software maintenance has been increasing steadily and many companies spend approximately 80% of their software budget on maintenance.

—Why do we spend 80% of budget?

—Actually, we didn't apply lean principles while developing these applications

—We can convert up to 40% of maintenance spend to new development and R&D, if we develop new applications applying Link List Approach For Lean Development.

Link List Approach For Lean Development

—Re-usable Design and methods

—Loose Coupling (Flexibility) among components

—Smaller Methods

—Easy Navigation among methods

—Benefits

—Easy to understand

—Cheaper to maintain

—Application code and design is of High Quality
